A Message to the Students

In Flux means “in constant change”. And that is what the **inFlux** course is about. It is about providing you with a different environment in every class you attend. There will be fascinating topics and a wide range of activities, which will keep you interested and motivated during the whole course.

inFlux brings real life communication into the classroom by combining two of the most effective approaches to English language teaching: the Communicative Approach and the Lexical Approach. Therefore, the course focuses on:

- Listening, understanding other people’s ideas, and speaking. These are the most useful skills in person-to-person communication. However, all skills, including reading, writing and grammar, are properly balanced during the course, so that at the end of it you will have mastered the English language;
- Fast-paced, dynamic classes with activities based on comparison and equivalence between English and Portuguese;
- Conversation activities that use language which you will most likely encounter outside the classroom.

The **inFlux** course comprises five books, plus access to many other resources:

Book 1 – Basic Level

Book 2 – Lower Intermediate Level

Book 3 – Intermediate Level

Book 4 – Upper Intermediate Level

Book 5 – Advanced Level

The following symbols are found throughout the books:

The symbol  marks the sections that are available on Audiobook app.

The symbol  marks the sections that will be used during the conversation drills in class.

inFlux will develop in you an active, rather than a passive, command of English. And on completion of this five-level course you will have achieved an advanced competence in the language.

Uma Mensagem aos Alunos

In Flux significa “em constante mudança”. É isso que traz o curso **inFlux**. Ele te proporciona um ambiente diferente a cada aula. Haverá assuntos fascinantes e uma grande variedade de atividades, que o manterão interessado e motivado durante todo o curso.

inFlux leva comunicação do dia a dia, da vida real, para a sala de aula, combinando duas das mais eficazes abordagens no ensino da língua inglesa: a Abordagem Comunicativa e a Abordagem Lexical. Portanto, o curso dá ênfase a:

- Ouvir, entender ideias de outras pessoas, e falar. Estas são as habilidades mais úteis na comunicação entre pessoas. No entanto, todas as habilidades, incluindo ler, escrever e gramática, estão perfeitamente balanceadas durante o curso, de maneira que ao seu final você terá dominado a língua inglesa;
- Aulas dinâmicas e de ritmo rápido com atividades baseadas em comparações e equivalências entre inglês e português;
- Atividades de conversação que usam uma linguagem que você muito provavelmente encontrará fora de sala de aula.

O curso **inFlux** compreende cinco livros, além de oferecer acesso a muitos outros recursos:

Book 1 – Nível Básico

Book 2 – Nível Intermediário Básico

Book 3 – Nível Intermediário

Book 4 – Nível Intermediário Avançado

Book 5 – Nível Avançado

Os seguintes símbolos são encontrados em todos os livros:

O símbolo  mostra as seções que estão disponíveis no aplicativo Audiobook.

O símbolo  mostra as seções que serão utilizadas durante os exercícios de conversação em sala.

inFlux desenvolverá em você um comando ativo, e não passivo, de inglês. E ao término deste curso de cinco níveis você terá alcançado uma competência avançada da língua.

CONVERSATION ACTIVITIES

ACTIVITY

1

AN IMPRESSIVE MAN WITH AN EQUALLY IMPRESSIVE CAREER

He was born and raised in Sao Paulo, Brazil. He had a passion for speed ever since he was a child – his father built him a go-cart when he was four years old. Motorcycles, helicopters and model airplanes were among his favorite things as well.

He started racing go-carts officially when he was 13, and, already in his first race, he won the pole position and finished in first place. In 1981, he moved to Europe, where he began competing in the Formula Ford 1600, winning two championship titles that year: the Townsend-Thoresen and the RAC – Royal Automobile Club. The following year he won both the Pace British Formula Ford 2000 and the European Formula Ford 2000 championships, winning 22 races out of 28. Being a perfectionist and very strict with himself when it came to determination, in 1983, he won the British Formula 3 title. These extraordinary achievements made a great impression on many Formula 1 team managers, and in 1984 he began his Formula 1 career.

In 1985, racing for Team Lotus, he scored his first win at the Portuguese Grand Prix under heavy rain, and really impressed the audience with his flawless performance. In 1987, he won his first Monaco Grand Prix, considered one of the most important and difficult races in the world. By the way, he won six times in Monaco. Not only that, he won five of those races in a row, between 1989 and 1993; and because of that, he was nicknamed the “King of Monaco”. In 1988, he became Formula 1 world champion for the first time.

The year of 1989 saw one of the biggest rivalries in motorsports, where he and his teammate Alain Prost struggled constantly against each other for the championship. The following year he became a two-time Formula 1 champion. In 1991, he won for the first time in his homeland, driving the car stuck in 6th gear; that victory was very much celebrated throughout Brazil. Also in that year, he won the Formula 1 Championship for the third time. In 1993,

Norio Koike ©ASE

his first lap in a race at Donington Park, England, was considered the best first lap ever in Formula 1 history.

His impressive career tragically ended in 1994 when, during a race at the San Marino Grand Prix, his car suddenly left the racetrack and crashed into a concrete wall at 200 km/h. Paramedics struggled hard to save his life, but he was pronounced dead in a hospital some hours later.

He was a very generous human being and used to help many people with his personal fortune. Prior to his death, he had talked to his sister about his will to do something for the Brazilian kids. After his death, she founded the Ayrton Senna Institute, of which she is still in charge. According to his family, he was very dedicated to whatever he did. His nephew Bruno really takes after him and even raced for a brief period in Formula 1.

Nowadays, many still consider Ayrton Senna da Silva the best driver of all time. That is because he always had fierce determination and total dedication to what he did and believed in. He was inducted into the International Motorsports Hall of Fame in 2000. Those who could watch him race say that, ever since his passing, no Sunday has been the same.

Customer: Uh, something's wrong with my car.

Mechanic: What seems to be the problem?

Customer: Well, it's making a funny noise. Oh, and it keeps dying as well.

Mechanic: Oh, I see. Well, anything else?

Customer: Yeah. The brakes are also making noise. And I think it's leaking oil or something because there's a funny smell too.

Mechanic: Right. And when was the last time you had your car serviced?

Customer: Well, I haven't had it serviced yet since I bought it.

Mechanic: And how long have you had this car?

Customer: About five years. But these problems have only started recently. By the way, it took me a long time to get it started this morning too. So, what do you think it might be?

Mechanic: Well, definitely the engine as well as the brakes need checking. But judging from what you said, lots of other parts need checking, repairing, and replacing too.

Who needs a broom or a vacuum cleaner? And no more climbing a ladder to reach those high corners! This tiny flying gadget scans your home from above, detecting every dusty corner and messy spot. Once it finds dirt, it adjusts its size – shrinking to fit under furniture or expanding to clean larger areas. It hovers over the spot, gently lands, vacuums everything in seconds, and then flies off again. When the job's done, it returns to its dock, empties the dust, and recharges – all by itself. It'll make you forget vacuuming was ever a chore. (___)

It releases a soft lavender scent to help you relax. And if you're still tossing and turning, it gently talks to you, telling calming bedtime stories or whispering soft lullabies until you drift off. It uses advanced steam and air technology to leave everything looking freshly ironed and ready to wear. From shirts and pants to dresses and bed sheets, it can handle it all. TRIVIA & CURIOSITIES

Hubert Cecil Booth, a British engineer, received a patent for a vacuum cleaner on August 30th 1901 and took the form of a large, horse-drawn, gasoline-driven unit, which was parked outside the building to be cleaned with long hoses being fed through the windows. The first "portable" electric vacuum was invented in 1905 by Chapman and Skinner in San Francisco. It weighed 42 kilos and used a fan 50 centimeters in diameter to produce the suction. Because of its size, it didn't sell well. Several other vacuuming devices have been invented since then in order to reach the current models on the market today.
